Affirmative Action Advisory Committee Meets

New and retiring members of the Affirmative Action Advisory Committee met at a luncheon at the Brookhaven Center on June 30. Shown above in the front row are George Bryant, retiring chairman, and Maurice Goldhaber, Laboratory Director. In the rear are Ruth Wright, new member; Evonne Hammond, Committee secretary; George Vineyard, Deputy Director; Joseph Washburne, Personnel Manager; Patricia Wilson, Beverly Gwathney, Yreana Flack, and Robert Hoyte, new members; Paul Kelly, retiring member; and R. Christian Anderson, Assistant Director. Not present were Ella McLean, retiring member; Claire Shellabarger, new member; and Jack Cusack, Harry Palevsky, and Charles Pretlow, carryover members.

FTS Code Change

BNL's FTS Identification Code has been changed to CB-89-52, effective July 1, 1970.

The GSA (General Services Administration) operators will not complete any FTS calls to or from Off-Net-Locations unless the caller furnishes the following information, and in sequence:

- 1. Your Name,
- 2. BNL's Identification Code, and
- 3. The complete 10-digit commercial telephone number you are calling.
- 4. For example: Mr. Doaks, CB-89-52, 202-343-7811.

USSR Scientists Visit BNL

Three scientists from the USSR visited the Laboratory last week. They discussed nuclear physics in general, low temperature plasmas, magnetohydrodynamics, concrete polymer, and other technological applications of radiation. Prior to arriving at BNL, the Soviet visitors had attended a meeting entitled "Impact of New Technology on Defense and Disarmament" held in Racine, Wisconsin

Distinguished visitors from the USSR discuss superconductivity with William B. Sampson of BNL's Metallurgy Department. (left to right) Dr. Oleg I. Kozinets, physicist at the Lebedev Physics Institute, Moscow; Dr. Vasili S. Emelyanov, Chairman of Disarmament Committee, USSR Academy of Science, Moscow; and Dr. Vyacheslav V. Sychev, Deputy Director, Institute for High Temperatures, Moscow.

Sewage Waste Used To Develop New **Construction Products**

Sewage waste and refuse is substituted for normal aggregate in a concrete type product under development at Brookhaven National Laboratory. The new product has a compressive strength equal to or greater than ordinary cement concrete.

The current work is a continuation of the research that successfully developed concrete-polymer, which is four times stronger than ordinary concrete and for all practical purposes, impervious to corrosion and freeze-thaw damage. Concretepolymer is now in the initial stages of being available through commercial sources, and is considered particularly useful for corrosion resistant sewer and drain pipes, building blocks, railroad ties, underwater structures, and large, multi-stage flash distillation vessels for saline water conver-

A report on the latest developments in polymer research at BNL was made by Meyer Steinberg, DAS, at the 16th Annual American Nuclear Society meeting recently held in Los Angeles. Other members of the research team, who are co-authors of the report, are Bernard Manowitz, Lawrence E. Kukacka, Peter Columbo, J. Fontana, and Gerald Farber, all of the Department of Applied Science.

What Do Those **Smoke Signals Say?**

Here we go again; that pack of cigarettes from on-site vending machines is going to cost 55¢ commencing on or about July 10. Rising wholesale costs and taxes have caused recent price increases in off-site vended cigarettes and now for on-site machines as well. BERA will benefit too as the recipient of the commission on candy and cigarette sales.

(Left to right, bottom row) Dr.V.V. Sychev; Dr. Leland Haworth; Dr. V.S. Emelyanov; Dr. Maurice Goldhaber, Director of BNL; Dr. O.I. Kozinets; and Dr. Gertrude Scharf Goldhaber. (Left to right, top row) Dr. Ernest D. Courant; Dr. Samuel Goudsmit; Daniel M. Schaeffer, Dr. George H. Vineyard, Deputy Director of BNL; Dr. G. Kenneth Green; Dr. Harvey E. Wegner; and Dr. David Gurinsky; following a luncheon meeting.

Cotzias Urges Slow Regimen With L-Dopa

Parkinson's disease patients at Brookhaven National Laboratory who have been receiving first D,L and later L-Dopa into the sixth year require usually diminution of the dose needed to maintain maximum benefit and some exhibit much slower deterioration than do untreated or otherwise treated patients. This suggests that L-Dopa does not only supply a missing and consumable material (dopamine) to the brain but may also provide the brain with new "spare parts" which enable it to hold the line against further deterioration.

These findings were reported by Dr. George C. Cotzias of the BNL Medical Research Center who, with his colleagues, developed a successful method to treat Parkinson's disease with L-Dopa. Dr. Cotzias spoke in Chicago at the 119th Annual Convention of the American Medical Association, where he delivered the George R. Minot Memorial Lecture.

In an interview in Chicago Dr. Cotzias stated, "This is our sixth year of treating patients with Parkinson's disease, first with D, L-Dopa and then with L-Dopa under close observation. We are impressed by one fact and one piece of strongly suggestive evidence.

"The factual evidence is that the maintenance dose of L-Dopa can be diminished in many patients with passing time. L-Dopa does not therefore lose its potency as is the case with other drugs.

"The strongly suggestive piece of evidence is that, regardless of the degree of improvement, we no longer seem to get the inexorable deterioration of Parkinson's disease which our patients had been showing prior to receiving L-Dopa and while receiving other medications.

"We propose for further study that perhaps the progressive deterioration of the disease is being delayed in some cases by L-Dopa. The net effect of L-Dopa seems much more fundamental than the mere replenishment of missing dopamine.

"The side effects, other than involuntary movements, so commonly reported by others but rarely seen by us, are probably due to a too rapid rate of increasing the daily dose. This can be avoided only by supplying the physicians with smaller pills. From our six years of experience we have learned it is imperative that a 'go-slow' process be observed in building up the dose and maintaining it at a level where maximum benefits with minimum side effects are achieved.

"In our hands the daily dose has averaged 5.8 grams, with a maximum of 8 grams per day, and the maximum improvement has rarely been achieved in less than six weeks. A symptom such as tremor may need many months of treatment before it

'The reason why 'going-slow' in increasing the daily dose rate is so important is that L-Dopa, like insulin, can be a toxic agent if used carelessly. With L-Dopa, nausea, vomiting, loss of appetite and faintness will not pose serious problems if the physician carefully adjusts the drug to each patient's requirements. Like insulin, L-Dopa cannot be given in an identical manner to all."

In their current research, Dr. Cotzias and colleagues have used over 16,000 healthy, normal mice and smaller numbers of other animals.

Brookhaven Area AEC Administrative Changes

Effective July 1, 1970, Gordon E. Stubbings was designated Acting Area Manager of the AEC's Brookhaven Area Office, due to the retirement of E.L. Van Horn. Mr. Stubbings has been with the AEC since 1947 and previously was Director of the Operations Division of the Brookhaven Office.

Gordon E. Stubbings

Effective July 1, 1970, David Schweller became Acting Director of the Operations Division of the AEC's Brookhaven Area Office. Mr. Schweller has been with the AEC since 1962 and previously was Assistant Director for Reactors and Safeguards, Operations Division, Brookhaven Office.

Joseph F. Frino

David Schweller

Effective July 4, 1970, Joseph F. Frino became Acting Director, Finance & Administrative Division, of the AEC's Brookhaven Area Office, replacing Charles G. Yax who retired. Mr. Frino has been with the AEC since 1956 and previously was Chief, Administrative Branch, Brookhaven Office.

Safety Equipment

Safety equipment issues in the lower level of building 535 are as follows:

Safety Shoe Issues Mondays - 1300 - 1630 Thursdays - 0900 - 1200 Safety Spectacle Issues Mondays - 0900 - 1200 Wednesdays - 1300 - 1630

There will be no issue of safety shoes on Monday, July 20th, and Thursday, July

Looking At Moon Craters

Members of the Long Island Communicators Association met at Brookhaven last week to hear lectures on nuclear power and lunar research. While visiting the Chemistry Department visitors were given a close look at microcraters on BNL's lunar sample. Dr. Vance Sailor and Dr. Ray Davis spoke to the Communicators during the courseof the afternoon program.

On June 24, Mr. E.L. Van Horn, Manager, AEC Brookhaven Office, presented awards to the above employees. (L-R) D.C. Moore, Director, Engineering & Construction Division, received a Certificate of Appreciate; Wallace E. Myott, Engineering & Construction Division, received a 10 Year Service Pin; Charles G. Yax, Director, Finance & Administrative Division, received a Certificate of Appreciation; E.L. Van Horn, Manager; Gordon E. Stubbings, Director, Operations Division, received a Certificate of Appreciation; Harmon S. Potter, Chief, Patent Group, received a Letter of Appreciation; and W. Robert Casey, Operations Division, received an Achievement Award.

Salvation Army Donation Campaign

The Salvation Army needs no introduction nor does it need a lengthly explanation of its good works. Since its founding in 1880, the organization has touched countless numbers of people with their family welfare services, missing persons bureau, children's homes and nurseries, centers to aid the recovery of alcoholics, men's rehabilitation centers, clinics, hospitals, USO clubs.

Like any army, the Salvation Army needs help to operate its many and varied centers. Representatives of the Army will be here at BNL on Thursday and Friday, July 16 and 17, to ask for that help. But even in their asking, they are giving. For your donation of \$3 or more, you will receive a women's or men's cosmetic kit valued at over \$10.

Cosmetic kit distribution points will be located at the cafeteria from 8 a.m. until 2 p.m. and in the parking lot across from the bank from 10 a.m. until 4 p.m.

Deadline For Tennis

Even if you were not good enough to make the Winbelton Tourney, there is an opportunity for you to make a name for yourself in the '70 BERA Tennis Tournament. However, you must sign up by tomorrow, July 10, at 2:00 p.m. The Tennis Committee meets to make the drawing at 3:00 p.m.

Results of the drawing will be posted in the Gymnasium by Monday noon, July 13. Each contestant is expected to consult the schedule and arrange a time for match play during the week scheduled.

The Men's Doubles Tournament has been named the Walter W. Merkle Tournament to honor the memory of the veteran BNL player who died last year.

The Tennis Committee will welcome volunteers to help in officiating during the tournament finals.

Rules and Regulations:

- 1. The Tournament Schedule will be posted in the Gymnasium immediately after the deadline date for entries.
- 2. Each round must be completed by the end of the week scheduled (Monday - Sunday). Tennis Committee reserves the right to forfeit unplayed matches.
- 3. Matches may be played at any time during the week by mutual agreement. Contestants are encouraged to play early in the week.
- 4. Matches may be played on our courts or elsewhere by mutual agreement.
- 5. No postponements beyond the week scheduled.
- 6. Second and Third round matches may be played whenever First round match has been completed.
- 7. Matches will consist of best 2 out of 3 (sets), including finals, and must be completed when started unless other arrangements have been made prior to start of match by mutual consent of the contestants.
- 8. Winners of matches are requested to report scores to the Recreation Office as soon as possible.
- 9. Awards will be awarded by BERA. The number of awards, per tournament, will be decided by the number of partici-
- 10. Each contestant must furnish container of new balls (championship grade) for match. Winner receives unused container of balls. Balls may be purchased at the Recreation Office weekdays from 9:00 a.m. to 1:00 p.m.
- 11. The finals in each event will be scheduled by the Recreation Office.

Movie Presented by French Group

Thursday, July 23 - Berkner Hall 8:30 p.m.

The 400 Blows

The French Group cordially invites all film lovers to the showing of Francois Truffant's early masterpiece which won the New York Critic's Award and the Director's Prize of the 1959 Cannes Film Festival.

The 400 Blows, the first and foremost New Wave movie, is the moving story of a young boy turned outcast. Not loved at home, he sinks into a private and fugitive existence that leads to reform school. Actually the autobiography of Truffant's childhood, The 400 Blows, has now been reedited by him into a new and never-before-seen version.

"- One of the great timeless French pictures -" New York Post

English subtitles - Admission \$1.50

Movie Tonight

Thursday, July 9 - Berkner Hall - 8:30 p.m. Robin Hood

Come one, come all to this old, wellacted silent version of Robin Hood starring Douglas Fairbanks. A dynamic man, Fairbanks dominated Hollywood's silver screen for twenty years as a swashbuckling hero. He did his own stunt work, wrote many of his own screenplays, and was a cofounder of United Artists Corporation (along with Charlie Chaplin, Mary Pickford, and D.W. Griffith).

Shorts: The Witness - A very humorous lecture by Robert Benchley.

The Case of the Mukkinese Battle Horn - Starring Peter Sellers, this movie is a spoof on the traditional British Scotland Yard mystery stories. It concerns one very inane, bumbling inspector who is trying to uncover a gang of smugglers whose specialty is Mukkinese battle horns. (For those who don't know, a Mukkinese battle horn is like a "trumpet, only with a little more plumbing.") --- V. Levis

New York Met's Tickets

There are still tickets left to the BERA box for the 1970 Met's season at Big Shea! Be sure to see the 1969 World's Champions at least once. The tickets can be picked up at the Recreation Office at 3 Center Street at any time between 9:00 a m and 1:00

Here and There

Claire Lamberti

Robert F. Smith (Photography) recently attended the AMA Annual Convention; he served as Chairman of the National Committee for judging scientific and technical exhibits.

L. Baker (Safety Services) was the guest speaker at the June meeting of the Town of Brookhaven Fire Chief's Council; his subject was the Brookhaven National Laboratory fire protection program. He also reviewed the curriculum being offered in Fire Science by Suffolk County Community College.

Y. Shimamoto (Applied Math) attended the First New York City Graph Theory Conference, held at St. John's University on June 12; he presented a paper entitled "On Some Properties of Planar Graphs."

F.P. Cowan (I&HP) recently served as Chairman of the AEC Advisory Panel on Accelerator Radiation Safety during a visit to the National Accelerator Laboratory at Batavia, Illinois.

Alice J. Burton (Biology) recently conducted esr experiments with Dr. Snipes at Pennsylvania State University, University Park, Pennsylvania.

Powell Richards, William Eckelman, and Elliot Lebowitz (all DAS) will present papers at and participate in the Annual Society of Nuclear Medicine Meeting to be held in Washington, D.C., July 6-12.

Thomas Prach (DAS) traveled to Toronto, Canada to present a report of the Sodium Task Group of Committee E-3, Division N at the ASTM Meeting on June

Tune In!

#215 - With all the current clamor in the news about the gypsy moth invasion of the Ridge-Shirley-Mastic area, it should be of interest to all concerned with conservation and environment to observe, first hand, the extreme devastation caused by these insects. Take a noontime ride along the road paralleling the western perimeter of the Biology Farm at the eastern end of the site. I hear of no solution to the problem as of today. What is being done?

The current plagues of gypsy moth caterpillars in some areas of Long Island have produced a great deal of emotion and also much misinformation. Persons living in heavily infested areas deserve sympathy, but they should also be given the facts.

In the first place, there is little chance that a defoliated tree will die. In a month or so, when the caterpillars have pupated, the trees will put out new leaves. The only permanent damage that might result is in the case of a defoliated evergreen. If the homeowner has evergreens that are threatened by gypsy moth attack, he should spray them with Sevin from the ground. Sevin breaks down chemically within a week of its application, and therefore does not become an environmental contaminant the way that DDT and other long-lived chlorinated hydrocarbons

The gypsy moth is an introduced pest, and like most organisms released into a new environment, its populations are subject to violent oscillations. For instance, the Japanese beetle was a major plant pest on Long Island in the 40's and early 50's, but eventually a disease known as the milkly spore caught up with it, and now it is not even a minor nuisance. In the case of the gypsy moth, entomologists are predicting that the current population explosion on Long Island is due very soon to crash. This crash is brought about by a disease known as the polyhedral virus, but also by the increase in predators, of which there are several species of fly and wasp, and a beetle. These prey on the moth and should be permitted to catch up with it in sufficient numbers to control it. Aerial spraying with a chemical insecticide, even Sevin, will result in more destruction of the moth's natural enemies than of the moth itself.

One comforting note: In areas where complete defoliation has occurred, it is quite likely that most of the caterpillars have starved to death before they can reach the pupal stage. For this reason, areas heavily infested in one year are rarely seriously affected in the following

An excellent control for the gypsy moth is the spore material of the bacterium Bacilus Thuringiensis, now developed on an industrial scale. It is lethal to caterpillars, while not affecting other organisms. It is available in powder form under the trade name Thuricide. Another promising control is the polyhedral virus. Although still awaiting approval for commercial distribution, laboratory and field tests indicate that it may well end the gypsy moth menace once and for all, when it can be used on a large scale.

Soccer

M.T. Hutchings

BNL 4 Vs. Grumman 3 (2-1)

The soccer team gained its first win at the Laboratory on Saturday, 20th June, when they entertained a team from Grumman. We were very soon two goals up after guest player Hill, and then Preece, hit home good shots to remind us of our last encounter which ended in our 10-0 win! However, Grumman then settled down and shortly before the interval scored with a header by their inside forward. We regained the command early in the second half dominating the play with good teamwork. Hill got number three with a fine cross shot, and then Preece crossed from the left over our forwards' heads only to see their left back return the ball with a perfect center which opportunist Batchelor headed in. Shortly afterwards Batchelor had a goal disallowed for off-sides and also hit the post. Grumman then became much quicker on the ball and we began to slacken our pace and lose cohesion. A defensive muddle led to a scrambled goal for Grumman, and then they came closer with a free kick from the edge of the area. Using Brazilian World-Cup tactics, they planted a man in our wall of defenders who moved away as the kicker shot through to score. However, we regained our poise before the final whistle blew.

Honors were even on Monday, June 22nd, in the league competition. DAS/ AGS beat Physics 2-0. Physics narrowly beat Chemistry/Medical by a disputed penalty goal. Then Chemistry/Medical scrapped home over DAS/AGS 2-1. League Standings are now:

Played W L T F A **Points** 10 6 3 1 18 13 DAS/AGS 13 10 Physics 1 15 16 4 6 0 15 19 Chem/Med

With four more games to play DAS/AGS are in a nearly invincible position!

We play 5:30 Mondays at the Recreation Park. New players, summer visitors, etc., welcome!

BNL Mountain Club News

New Activities

The Mountain Club is sponsoring a Wildlife Photography Contest. There are two categories: Black/White and Color. You may enter both, as one winner will be selected from each. Submit not more than two 8×10 inch prints for each category; 35mm slides are acceptable in place of color prints. Include your name, address, camera make, lens. and location with each entry. Winning photographs will be selected by a panel of judges using the point system described below.

- 1. Species of Subject (Vertebrates only, please) - common to rare, 1 to 10 points
- 2. Approachability normally ignores humans to actively avoid them, 1 to 10
- 3. Personal Inconvenience in Obtaining Picture - none to considerable, 1 to 10 points (Obviously, shooting a grizzly at 25 yards with a 45mm lens poses more problems than using a telephoto at half a mile)
- 4. Composition poor to good, 1 to 10 points
- nical Quality poor to good, to 10 points. (It's a good subject but did not get it focused in time?)

Deadline for entries (all Lab employees and family members are eligible) is October 15, 1970. Winners to be announced at Club meeting on Tuesday, October 20, where all entries will be on display. Prizes will be awarded.

Submit entries to: Gary Hughes, Bldg. 911, AGS, Ext. 7541. Joe Fineman, Bldg. 26, Physical Review, Ext. 2296.

Showstoppers Does It Again!

SRO for Saturday night! In fact the Recreation Office tells us that there's even a waiting list! So please, all you nice people, if you have reserved a table for 10, but only 6 are coming, let the Rec. Office know so they can release the seats for someone else. And if you aren't going to be able to make it after all, please don't be a "no show." Cancel your reservations so they can be reassigned.

See you Saturday night in the North Room of the Center. Curtain time is 8:30 p.m.

Mixed Softball -- Good Action . . .

Good Form . .

Good Crowd.

Mixed Softball

🗕 by Georgia Irving 🛢

Anyone interested in seeing some specacular hall playing should stop by the Recreation Field any Tuesday night at 5:30 and join in the fun and action of mixed Softball. You'll never see this type of softball played by the Men's League they know what they are doing!

The teams have finally chosen the following names:

Team 1 Neutrons Team 2 Amoebas Team 3 Electrons He-Shes Team 4

There has been a definite trend in winning so far. The Neutrons have won 3 straight including their win over the Electrons by a score of 6 to 5 on June 23 and the Amoebas by 22 to 13 on June 30. Everyone is dazzled by their fielding (their hitting ain't bad either!)

The He-Shes have compiled 2 out of 3 wins by beating the Amoebas 10 to 9 on June 23 and the Electrons by an astounding 15 to 2 on June 30.

The poor Amoebas hope to climb out of the cellar in July with the return of two members from a trip to Europe - Sol Pearlstein and Red Cullen please hurry, we need some power hitters!

Those who have signed up to play and have not already payed the registration fee of \$2.00 are urged to do so immediately. If not, the first to pay their fee, whether or not they have previously signed up, will be the ones to play. For further information, contact Georgia Irving, Ext. 2186.

Swimming Pool

Summer Season June 15 through August

Passes may be purchased at the Pool Office during open hours. Employee rate \$10; family rate is \$20. Single admissions will remain the same at 50¢ for employees/family members and 75¢ for visitors. To make clear to all what is meant by visitors - an employee is entitled to bring with him 5 guests each visit.

The following schedule is now in effect:

Monday through Friday 12:00 noon - 1:30 p.m. Employees Only 1:30 p.m. - 9:30 p.m. Employees/Family/

Children

Parents bringing children to use the Pool should not do so any earlier than 15 minutes before their scheduled admission time. Children are to remain in the designated waiting area near the Pool's entrance until the pool opens for them and when waiting to be picked up by parents. The Gymnasium will not be available for this purpose.

Discount Coupons

Jones Beach - The Sound of Music Plymouth Theater - Plaza Suite.

Coupons good until July 31.

Madison Square Garden - Guided Tour. Ticket Reservations

20% discount for tickets to performances at the Bellport Gateway Playhouse. No discount for Saturday performances.

Program:

Now through July 12 - Mame

July 14 - July 26 - I Do! I Do!

July 28 – Aug. 9 – Cabaret

Aug. 11 – Aug. 23 – George M! Aug. 25 - Aug. 30 - Your Own Thing

Since Westbury Music Fair is no longer offering industrial discounts, the reservation service from the Recreation Office has been discontinued.

Athletic Equipment on Sale

BNL T-shirts, tennis balls, shuttlecocks, table tennis paddles, athletic socks, combination locks, shoe laces, playing cards. Also, information booklets on table tennis, baseball, diving, badminton, skin diving, judo, life saving, volleyball, archery and bowling.

The Recreation Office subscribes to several periodicals covering various phases of the entertainment field. Cue, Opera News, Commercial Review, Long Island Entertainer, and Stubs (which includes seating plans of most New York City theaters) are among those available for information and perusal at the Office.

Hospitality News

The next Hospitality Committee coffee meeting will be held next Monday, July 13, from 10 a.m. until noon in the apartment area recreation building.

Everyone is welcome. Bring the children.
